REVIEWS

Excellent color profiles, sharp and clear black and white pictures showing the airframes from different angles and often with enough of the upper surfaces...Highly Recommended.

IPMS

This book profiles six aircraft used by the Finnish Air Force during WWII and sets of decals...to go with each one. The Finnish Air Force was unusual in so far as their aircraft came from many different sources...each type is shown in color profiles on landscape format pages with brief descriptions and black and white reference photos. With each is a set of color references to help with your projects. The sheet of decals tucked inside the front cover applies to all six aircraft in each scale. All ideal if you are looking at something a bit different to apply to any of the varied list above.
