How to Disappear is no doubt the world s #1 guide for disappearing written by two of the leading experts on tracking people down. This book teaches all the tools about going underground, hiding from a stalker, offshore tools, falling of the grid and downright disappearing. The bottom line is we all want our privacy and How to Disappear can help. We decided when putting How to Disappear together to be honest and provide realistic information, no promises of new identities, no false guarantees just good information to aid you in your situation. There are numerous books about disappearing, falling off the grid and other related subjects that we have found to be unrealistic and downright misleading so there is no one answers to disappearing since we all have different lifestyles, finances, income making and predator differences. Disappearing starts with MISINFORMATION, DISINFORMATION AND REFORMATION but you have to understand pretext and social engineering, which it is lying and manipulating to obtain information for various reasons. A skip tracer, information broker or a stalker will pretext phone companies, banks and other organizations to get information about you, so you need to prepare and defend. Misinformation is locating information that is known about you and deviating. Disinformation is creating bogus trails for the stalker, predator or private investigator to find and follow. Reformation is getting from point A to point B successfully by leaving no clues. Some people pick up and split, however, they forget all of the information they have left behind. You will be more successful in your disappearance if you follow these three tools to the best of your ability. If you are serious about your privacy, disappearing or falling of the grid How to Disappear can help.
