## **The Internet for Nurses and Allied Health Professionals** Margaret J.A. Edwards

Isn't technology wonderful? As recently as four years ago, the complexity of communicating with professional colleagues in other time zones and on other continents was so confusing that most health care professionals simply used the international postal system (to call it a postal service would be an oxymoron). Only a few sophisticated technophiles among the academic elite of health care professions bothered to use the electronic computer networks. Today such communication is commonplace for many health care professionals. This book provides a guidebook for those health care professionals who are new to the information highway. Perhaps it is somewhat of an anachronism that this book, presented in a paper-based medium, provides a guide to the future electronic medium that may ultimately replace it. Perhaps the author will next write a multimedia interactive computer program for the material contained in this book. This book provides the novice on the information highway with information about access routes and destinations. It also serves as a driving instructor for the novice who wishes to join the queue at the access ramp for the information highway. For the experienced surfer on the Internet, this book suggests byways, short cuts and side routes to explore along the information superhighways. No one really knows what the future holds. One thing is certain, it will be a very exciting and exhilarating ride for those health care professionals who use this book to accelerate along the information highway.

In other case, beside science book, any other book likes The Internet for Nurses and Allied Health Professionals to make your spare time a lot more colorful. Many types of book like here.

#### **Millard Espinoza:**

As a pupil exactly feel bored for you to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this The Internet for Nurses and Allied Health Professionals can make you experience more interested to read.
