Microwave and RF Engineering

Ali A. Behagi, Stephen D. Turner

Microwave and RF Engineering Ali A. Behagi, Stephen D. Turner

Unlike many traditional textbooks on microwave and RF engineering written mainly for the classroom, this book adopts a practical, hands-on approach to quickly introduce and familiarize students and engineers new to this subject. Topics range from an introduction of lumped elements and transmission line components to multi-stage amplifier design. Theoretical concepts are explained through the real world computer models. The authors extensively include the use of electronic design automation tools to illustrate the foundation principles of microwave and RF engineering. This book introduces not only a solid understanding of microwave and RF engineering concepts but also more importantly how to use design automation tools to analyze, synthesize, simulate, tune and optimize these essential components in a design flow as practiced in the industry. Authors have designed the text to be a 'hands-on' book, loaded with practical examples. It stresses the importance of design automation techniques with heavy emphasis on Agilent's Genesys Linear Software suite. In addition to university and college students, engineers and technicians will find this text an invaluable reference to have in their library. The investment in learning the microwave and RF engineering foundation skills with design automation techniques taught in this book results in knowledge that remains relevant and sought-after for a long time to come.

From reader reviews:

Valerie Hemming:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the Mall. How about open as well as read a book eligible Microwave and RF Engineering? Maybe it is to get best activity for you. You know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with it is opinion or you have other opinion?

Robert Farley:

A lot of people always spent their free time to vacation or even go to the outside with them family members or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity that is look different you can read a new book. It is really fun for you. If you enjoy the book that you read you can spent the whole day to reading a publication. The book Microwave and RF Engineering it is rather good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. In the event you did not have enough space to create this book you can buy often the e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not too costly but this book offers high quality.

Jerry Jackman:

In this era globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. Typically the book that recommended for you is Microwave and RF Engineering this e-book consist a lot of the information on the condition of this world now. This specific book was represented how do the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The actual writer made some investigation when he makes this book. Here is why this book acceptable all of you.

Henry Buford:

As we know that book is essential thing to add our knowledge for everything. By a book we can know everything we wish. A book is a range of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This publication Microwave and RF Engineering was filled concerning science. Spend your extra time to add your knowledge about your scientific research competence. Some people has various feel when they reading a new book. If you know how big advantage of a book, you can truly feel enjoy to read a publication. In the modern era like now, many ways to get book you wanted.
