Global Information Society: Technology, Knowledge, and Mobility (Human Geography in the Twenty-First Century: Issues and Applications) Mark I. Wilson, Aharon Kellerman, Kenneth E. Corey

We have been living and working in the information society for decades, yet still we struggle to understand and keep up in the face of its constant flux and vast scope. In this unique interdisciplinary text, three scholars at the forefront of this dynamic field provide a clear conceptual framework and interpretation of the global information society. They explain the three pillars of the information society—technology, knowledge, and mobility—and the global information society as a whole, both as an interconnected web and a regionally distinct phenomenon. Offering a nuanced understanding of this complex subject, this book will enable students to navigate and thrive in the dynamic and evolving world of information and communication technology.
