Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications)
Weijia Jia, Wanlei Zhou

Both authors have taught the course of "Distributed Systems" for many years in the respective schools. During the teaching, we feel strongly that "Distributed systems" have evolved from traditional "LAN" based distributed systems towards "Internet based" systems. Although there exist many excellent textbooks on this topic, because of the fast development of distributed systems and network programming/protocols, we have difficulty in finding an appropriate textbook for the course of "distributed systems" with orientation to the requirement of the undergraduate level study for today's distributed technology. Specifically, from - to-date concepts, algorithms, and models to implementations for both distributed system designs and application programming. Thus the philosophy behind this book is to integrate the concepts, algorithm designs and implementations of distributed systems based on network programming. After using several materials of other textbooks and research books, we found that many texts treat the distributed systems with separation of concepts, algorithm design and network programming and it is very difficult for students to map the concepts of distributed systems to the algorithm design, prototyping and implementations. This book intends to enable readers, especially postgraduates and senior undergraduate level, to study up-to-date concepts, algorithms and network programming skills for building modern distributed systems. It enables students not only to master the concepts of distributed network system but also to readily use the material introduced into implementation practices.

From reader reviews:

Mary Gale:

Spent a free a chance to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they undertaking activity like watching television, going to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could possibly be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the guide untitled Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications) can be great book to read. May be it is usually best activity to you.

Karen Lawless:

This Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications) is great publication for you because the content and that is full of information for you who have always deal with world and possess to make decision every minute. This particular book reveal it details accurately using great coordinate word or we can declare no rambling sentences in it. So if you are read the idea hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but challenging core information with lovely delivering sentences. Having Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications) in your hand like keeping the world in your arm, facts in it is not ridiculous one particular. We can say that no e-book that offer you world within ten or fifteen moment right but this e-book already do that. So , this is good reading book. Hello Mr. and Mrs. occupied do you still doubt in which?

Dorothy Pierce:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you will get it in e-book way, more simple and reachable. This kind of Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications) can give you a lot of pals because by you checking out this one book you have thing that they don't and make anyone more like an interesting person. That book can be one of one step for you to get success. This guide offer you information that perhaps your friend doesn't know, by knowing more than various other make you to be great individuals. So , why hesitate? We should have Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications).

Nancy Herman:

Do you like reading a reserve? Confuse to looking for your preferred book? Or your book has been rare? Why so many concern for the book? But any kind of people feel that they enjoy regarding reading. Some people likes reading through, not only science book but additionally novel and Distributed Network Systems:

From Concepts to Implementations (Network Theory and Applications) as well as others sources were given expertise for you. After you know how the truly great a book, you feel wish to read more and more. Science reserve was created for teacher as well as students especially. Those textbooks are helping them to include their knowledge. In various other case, beside science guide, any other book likes Distributed Network Systems: From Concepts to Implementations (Network Theory and Applications) to make your spare time far more colorful. Many types of book like this one.
