The Blood Of Abraham, "Intifada, Uprising & Lessons In Asymmetrical Warfare" Major David A. Brown

A historical case study concerning the Israeli Army's response to the Palestinian "Intifada" or uprising in the late 1980's and early 1990's provides instructive planning considerations for likely future application of U.S. military force in an asymmetrical threat environment. The monograph specifically analyzes the time period from the beginning of the uprising until the handshake of Rabin and Arafat on the White House lawn September 13th, 1993.

Although the theoretical application of the case study is speculative of future environments, this paper attempts to link available historical data to anticipated trends in the international security environment and emerging concepts of operational art. The argument surrounding asymmetrical types of warfare leads into a discussion of the application of IDF lessons learned that may be applied to future U.S. military scenarios.
