Chemical Sensors and Biosensors (Iste)

Chemical Sensors and Biosensors (Iste)

Technological needs for chemical, ionic and biological species detection are giving rise to continuous research and development in physico-chemistry and biology. The constant progress being made in the theoretical and technological aspects concerning studies and developments of chemical sensors, biosensors and biochips is presented in this book by different scientists and professors from different universities and constitutes an updating of the state of the art for chemical sensors, biosensors and biochips.

This book places a large emphasis on interaction between chemical and biological species, in a gaseous or liquid state, and details mineral and biological materials acting as sensitive elements. The role of electrical, electrochemical, piezoelectric and optical transducers in detection mechanisms are presented through their developments and from a performance point-of-view. Micro-reactors, nanotechnologies and flexible substrates, are considered in relation to their role in neural networks.

Contents

1. Chemical and Biological Recognition, Nicole Jaffrezic-Renault.
2. Adsorption Phenomena, René Lalauze.
3. Microcantilever Transduction, Isabelle Dufour.
4. Piezoelectric Transduction (QCM), Hubert Perrot.
5. Metal Oxide Gas Sensors, Christophe Pijolat.
6. Molecular Material-based Conductimetric Gas Sensors, Marcel Bouvet.
7. Responses and Electrical Properties of Gas Microsensors, Khalifa Aguir.
8. Gas Microsensor Technology, Philippe Menini.
9. Multisensors: Measurements and Behavior Models, Philippe Breuil.
10. Development of Microtechnologies for the Realization of Chemical, Biochemical and/or Biological Microsensors, Pierre Temple-Boyer.
11. Development of Micro-preconcentrators for the Detection of Gaseous Species at Trace Level, Jean-Paul Viricelle.
12. Microfluidics: Manipulation of Nanovolume Samples, Louis Renaud.
13. Electrochemical Biosensors, Chantal Gondran.
14. Fiber-optic Biosensors, Neso Sojic.
15. In Vivo Analyses with Electrochemical Microsensors, Stéphane Arbault.
16. Microbial Biosensors for Environmental Applications, Gérald Thouand and Marie José Durand.
17. Biofuel Cells, Serge Cosnier.

From reader reviews:

Sam Holmes:

What do you concerning book? It is not important along? Or just adding material if you want something to explain what you problem? How about your extra time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They must answer that question because just their can do in which. It said that about e-book. Book is familiar on every person. Yes, it is suitable. Because start from on jardín de infancia until university need this particular Chemical Sensors and Biosensors (Iste) to read.

Henry Jensen:

Reading can called brain hangout, why? Because when you are reading a book specifically book entitled Chemical Sensors and Biosensors (Iste) your head will drift away trough every dimension, wandering in each aspect that maybe not known for but surely can become your mind friends. Imaging just about every word written in a book then become one type conclusion and explanation this maybe you never get before. The Chemical Sensors and Biosensors (Iste) giving you another experience more than blown away the mind but also giving you useful information for your better life with this era. So now let us teach you the relaxing pattern the following is your body and mind is going to be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Anthony Youngblood:

Your reading sixth sense will not betray an individual, why because this Chemical Sensors and Biosensors (Iste) e-book written by well-known writer whose to say well how to make book that could be understand by anyone who all read the book. Written inside good manner for you, dripping every ideas and publishing skill only for eliminate your personal hunger then you still skepticism Chemical Sensors and Biosensors (Iste) as good book not just by the cover but also by content. This is one publication that can break don't determine book by its include, so do you still needing one more sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to one more sixth sense.

Rita Campanelli:

Reading a book being new life style in this 12 months; every people loves to learn a book. When you study a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your study, you can read education books, but if you act like you want to entertain yourself read a fiction books, these us novel, comics, along with soon. The Chemical Sensors and Biosensors (Iste) will give you new experience in reading through a book.
