Neuroparasitology and Tropical Neurology: Chapter 13. Neurological manifestations of human leishmaniasis (Handbook of Clinical Neurology) Alejandro Llanos-Cuentas, Braulio M. Valencia, Christine A. Petersen

Leishmaniasis is a spectral disease, caused by obligate intracellular protozoa of the species *Leishmania*. There are multiple reported instances where neurological manifestations, whether central or peripheral, are described. In this review we describe neurological manifestations seen during infection with *Leishmania* spp. Taken together, the material discussed here suggests that in patients from *Leishmania*-endemic areas, when observing neurological symptoms, causation secondary to infection with *Leishmania* spp. may be considered.
