Traumatic Brain Injury: An Overview & The Clinical Management Of TBI Course Materials U.S. Army

Traumatic Brain Injury (TBI):

A traumatic brain injury is a blow or jolt to the head that disrupts the normal function of the brain. The severity of the TBI is determined at the time of the injury and may be classified as: mild, moderate, or severe.

TBI FACTS:

TBIs can occur on the battlefield, on the football field, on the playground, in a car accident, and even at home.

There are four categories of TBI including mild, moderate, severe and penetrating.

A mild TBI (mTBI), which is also known as a concussion, is the most common form of TBI.

mTBI/CONCUSSION FACTS:

An mTBI/concussion is a brain injury that requires prompt treatment.

An mTBI/concussion is treatable; early detection is extremely important.

Common causes of an mTBI/concussion on the battlefield include blasts, vehicle collisions, or blows to the head.

Common symptoms following an mTBI/concussion may include headache, dizziness, fatigue, difficulty concentrating, and memory problems.

The Army has a comprehensive system of worldwide TBI care. Click the link in the "TREAT" box to locate an Army facility near you.
